1. What is normalization?

2. What is a surrogate key?

3. What is a clustered index?

4. What is a non-clustered index?

5. What is the purpose of the EXISTS operator in SQL?

6. Which operation combines the results of two queries?

7. What is SQL injection?

8. What is the use of the HAVING clause?

9. What is a view in SQL?

10. Which normal form removes partial dependency?

11. Which normal form removes partial dependency?

12. What is a schema in a database?

13. What is a cursor in SQL?

14. What is normalization?

15. What is the purpose of the EXISTS operator in SQL?

16. What is SQL injection?

17. Which normal form removes partial dependency?

18. What is the use of GROUP BY in SQL?

19. What is a non-clustered index?

20. Which database language is used to define database structure?

1. What is a deadlock in database transactions?

2. What is the primary key in a database?

3. What is a schema in a database?

4. What is a deadlock in database transactions?

5. What is a composite key?

6. What is the primary key in a database?

7. Which SQL clause is used to sort results?

8. What is the primary key in a database?

9. What is the primary key in a database?

10. What is referential integrity?

11. What is the difference between OLTP and OLAP?

12. Which normal form removes partial dependency?

13. What is a foreign key?

14. What is a composite key?

15. What is a foreign key?

16. What is the purpose of an index in a database?

17. What is the difference between CHAR and VARCHAR?

18. Which normal form removes partial dependency?

19. What is a non-clustered index?

20. Which normal form removes partial dependency?

1. Which operation combines the results of two queries?

2. Which command is used to create a new database?

3. What is a schema in a database?

4. What is the primary key in a database?

5. Which SQL keyword is used to fetch unique records?

6. What is a foreign key?

7. What is the purpose of an index in a database?

8. What is a transaction in a database?

9. What is a view in SQL?

10. What is denormalization?

11. What is normalization?

12. Which SQL keyword is used to fetch unique records?

13. What is the difference between INNER JOIN and OUTER JOIN?

14. What is the role of a database management system?

15. What is a cursor in SQL?

16. What is the difference between CHAR and VARCHAR?

17. What is a schema in a database?

18. What is the difference between OLTP and OLAP?

19. What is a transaction in a database?

20. What is the difference between INNER JOIN and OUTER JOIN?

1. What is the role of a database management system?

2. What is normalization?

3. What is the difference between DELETE and TRUNCATE in SQL?

4. What is a deadlock in database transactions?

5. Which SQL keyword is used to fetch unique records?

6. What is a composite key?

7. What is a surrogate key?

8. What is an ER model?

9. What is the primary key in a database?

10. What is referential integrity?

11. What is a cursor in SQL?

12. What is a foreign key?

13. Which normal form removes partial dependency?

14. What does ACID stand for in databases?

15. What is the use of the HAVING clause?

16. What is a foreign key?

17. Which SQL clause is used to sort results?

18. What is an entity in a database?

19. What is a schema in a database?

20. Which SQL keyword is used to fetch unique records?

1. What is a non-clustered index?

2. Which SQL clause is used to filter records?

3. What is a clustered index?

4. Which data model is used in relational databases?

5. What is a schema in a database?

6. What is denormalization?

7. What is the difference between UNION and UNION ALL?

8. What is normalization?

9. Which SQL command is used to update records?

10. Which database language is used to define database structure?

11. What is a clustered index?

12. What is the difference between OLTP and OLAP?

13. Which SQL keyword is used to fetch unique records?

14. What is referential integrity?

15. What is SQL injection?

16. What is the difference between OLTP and OLAP?

17. What is the difference between OLTP and OLAP?

18. Which normal form removes partial dependency?

19. Which SQL clause is used to filter records?

20. What is a composite key?

1. What is the difference between DELETE and TRUNCATE in SQL?

2. Which SQL keyword is used to fetch unique records?

3. What is a composite key?

4. What is SQL injection?

5. What is the difference between CHAR and VARCHAR?

6. What is SQL injection?

7. What is a surrogate key?

8. Which SQL clause is used to filter records?

9. What is a deadlock in database transactions?

10. Which SQL keyword is used to fetch unique records?

11. What is the difference between INNER JOIN and OUTER JOIN?

12. What is an ER model?

13. What is the use of GROUP BY in SQL?

14. What is SQL injection?

15. Which SQL clause is used to sort results?

16. What is referential integrity?

17. What is a foreign key?

18. Which SQL command is used to update records?

19. What is denormalization?

20. What is an ER model?
